GRANT MANAGEMENT TOOL

The Odysseus Enterprise System is a complete platform of independent but integrated web-based tools that are designed to alleviate the burden on planning and preparedness professionals. Odysseus provides standardization and flexibility, utilizing a suite of applications that promote participation, collaboration, transparency, and compliance. This union of technological and programmatic features offers organizations an efficient and effective method to systematically design, develop, maintain, and continually improve programs and operations throughout the preparedness, response, recovery, and mitigation/protection phases.
